Announcement of Expanded Certification

All Customers,

I am pleased to announce we have expanded our NADCAP certification to include **Chemical Conversion Processing**. This adds to our already certified QMS and Paint certifications. At this time, we welcome all opportunities to quote NADCAP processing for Chemical Conversion coating (Chemfilm) using either traditional Gold coating, or the ROHS compliant Clear coating. Our xlarge, over 500 gallon tanks can handle the big jobs, or the big parts. Our experience goes back many years now with processing Chemical Conversion, and have obtained several customer approvals from non-NADCAP required companies along the way.

As always, we will continue to give excellent lead times and costs, along with our commitment to continuous improvement, and certified quality performance. Please give us an opportunity to show you how we can be a truly value added supplier for years to come.

I can be contacted directly about our scope at 480-276-9954.
Visit us on our website at www.performancecoating.com

Best Regards,

Ron Courey
